2. Released Items

#	Released Items	Status	Description
1	ExtNAP: Function Management	Changed	Detail is described below
2	NAP: Function Management	Changed	Detail is described below

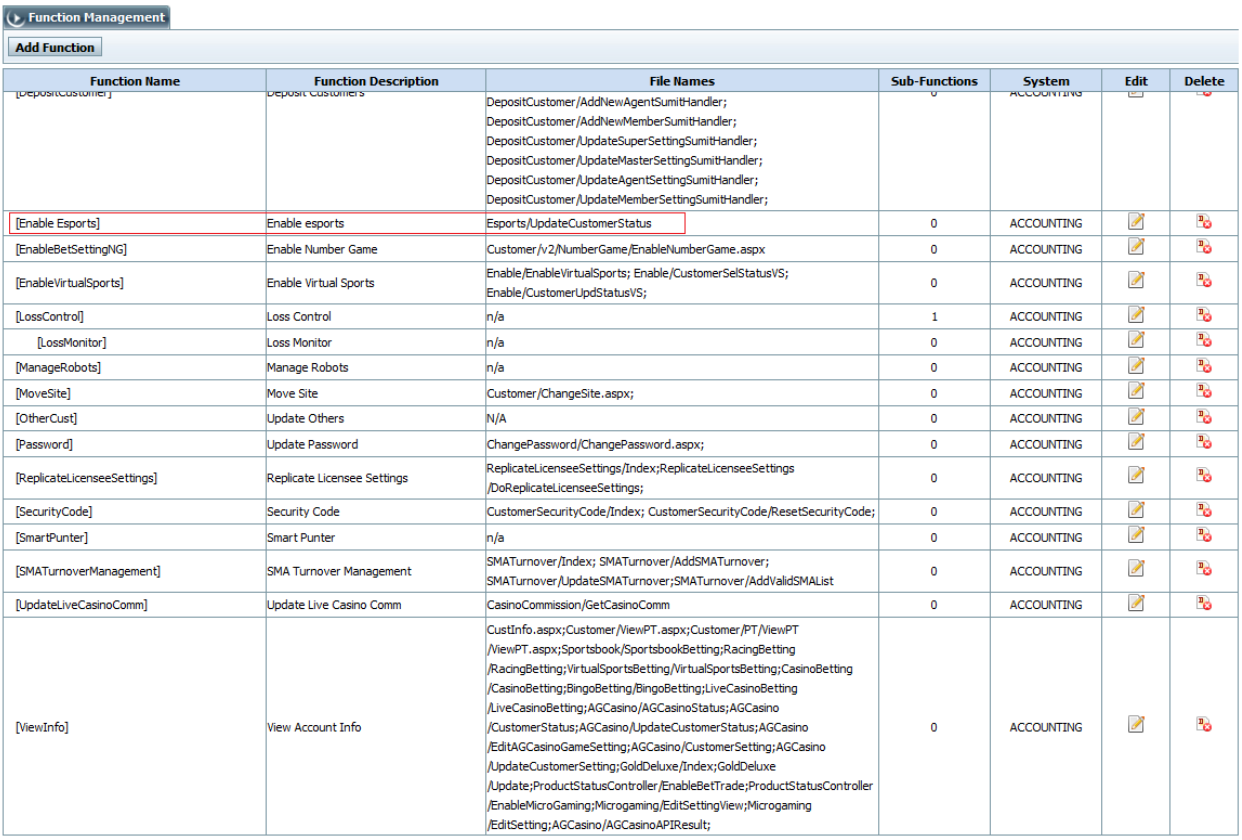

3. Screenshots of the changes

3.1. External NAP: Function Management

- Create a function name **Show Enable Esports** in the Administration > Function Management function.
- If the function is assigned as Read for a user (adminut1), the user shall see the row of Enable Esports on the left panel.
- If the function is not assigned for a user, the user shall not see the row of Enable Esports on the left panel.
- To be able to update the status of esports, a user must have both permissions: Host Permission on **Enable Esports** and Read Permission on **Show Enable Esports**
- The validation to be able to update the status shall not be able to be checked on SP side but on web side. Therefore, web must assure there is no way to by pass this validation by anyhow.

3.2. NAP: Function Management

Function Management

- In the User > Function Management function, create a new file named **Esports/UpdateCustomerStatus**.
- In the User > Function Management function, create a new function named **Enable Esports** which use the new file Esports/UpdateCustomerStatus.
- In the core of the enable/disable product, control the permission to enable/disable the Esports by the new function Enable Esports instead of the current View Account Info.
