1. Overview

Release date	August 02nd, 2016
Release time	11:00AM – 12:30PM (GMT+8)
Purpose	Block SMAs to access Alpha site in Philippines
Affected Sites	Alpha – desktop and smartphone versions for both MBC and 789y sites

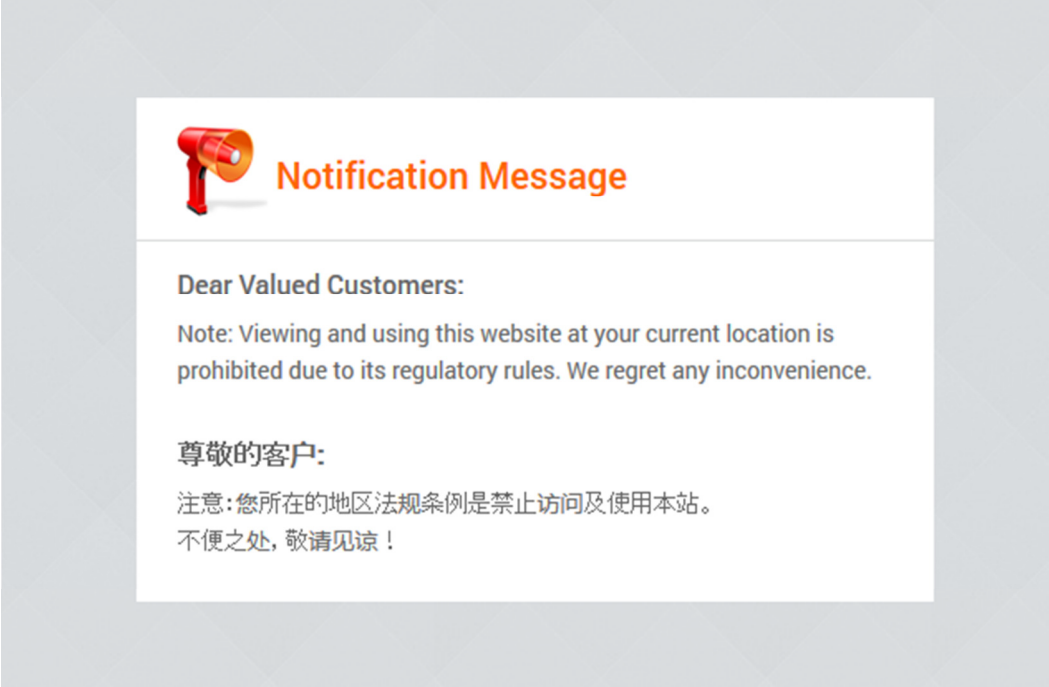

2. Released Items

#	Released Items	Status	Description
1	Alpha – desktop → Before login	Changed	– Show the announcement to SMAs when they access Alpha site via Philippines IP if their IP is not in whitelist
2	Alpha – Smartphone → Before login	Changed	– Show the announcement to SMAs when they access Alpha site via Philippines IP if their IP is not in whitelist

3. The blocking flow

3.1. Announcement page

– When users access to domains of Alpha site, they will be redirected to a page with the announcement shown as follow:

- When users access to domains of Alpha site, if user's IP is in whitelist or is one of Philippines Office IPs, he will be redirected to the login page as usual.

3.2. Whitelist function

- Because system performs check & block before login so it can only use whitelist of IP(s) instead of SMA accounts. If user requires access via Philippines IPs, our Starix team can support by adding his IP into whitelist manually.
- The whitelist is only applied for access in Philippines. For Singapore and Australia, it still follows policy of blocking.
